

Say Yes to Life! – the Environmental Policy for Newport Methodist Church.

Policy Statement

We recognise the urgency of the climate and nature crises and how they are having the greatest impact on the poorest countries.

We will take practical steps necessary to work towards caring for Creation.

Denominational commitment

As members of Newport Methodist Church, we recognise the commitment made by the Methodist Church of Britain and Ireland to reach **Net Zero*** by 2030, adopted by Conference in 2021.

** Net zero refers to a state in which the greenhouse gases going into the atmosphere are balanced by removal out of the atmosphere.*

In line with the Methodist Church's commitment to net zero, we aim to reduce our **carbon footprint**[†] year on year.

†The total amount of CO₂ and other greenhouse gases that are generated by the choices we make, including the food we eat, heating, transport and disposal of waste.

Our principles and values

God created the world and everything in it.

God has created an awesome and majestic cosmos to bring him praise and glory. We are but one part of his created order. Jesus has redeemed the whole earth through his death and resurrection. We have a special responsibility to care for the Earth so that human life and all God's creation may be sustained in harmony.

In the beginning, God created the heavens and the earth (Genesis 1:1).

Our church is committed to minimising our negative impact on the environment.

As Christians it is our responsibility to care for creation, using resources wisely so that climate change is slowed down, biodiversity protected or enhanced, finite resources conserved, and waste and pollution minimised.

Creator of the heavens, who stretches them out, who spreads out the earth with all that springs from it, who gives breath to its people, and life to those who walk on it (Isaiah 42:5).

Seeking climate justice is part of Christian discipleship and practice.

Following Christ's teachings means loving our global neighbours and caring for creation. The climate crisis both reflects and feeds off inequality, exploitation and

greed: often the communities who are suffering the most from its effects, particularly in the Global South, are those who have done the least to cause it. We will aim to act in accordance with this understanding, making changes to improve our sustainability and to show solidarity with those across the world who are suffering in this crisis.

What does the Lord require of you? To act justly, to love mercy and to walk humbly with your God (Micah 6:8).

Our commitments

Worship and Teaching

We will communicate our biblical understanding of responsibility to God for all that is entrusted to us through creation, making the links between poverty, wealth and environmental degradation. We will strive to equip leadership, staff, volunteers and church members with the skills, knowledge and confidence to respond to this responsibility.

Buildings and Energy

We recognise the most important environmental impact will be an ongoing reduction of our carbon emissions. We will seek to reduce our greenhouse gas emissions as much as we can, working toward net zero carbon.

Land and Nature

We will respond to the nature crisis and loss of biodiversity through practical action, collaboration and campaigning.

Community and Global Engagement

We will highlight and raise awareness that the climate and nature crises affect the poorest first and most severely. Our responsibility is to them and the places they live, wherever they are in the world, to promote fairness for people and nature.

Lifestyle

We recognise that we have an impact on the world through the choices available to us and our use of money and resources. We will strive to support our church family and wider community in bringing about positive change and care for God's Earth. We will encourage our church community and beyond to live lightly on the Earth and be prepared to challenge inequality.

A Review of the proposed actions outlined in the Objectives section of the Environmental Policy will be carried out annually.
